Hand Injuries	1
Dropped	2
Eye Injuries	0
LSR	2
SIFp Incidents	1

TODAY'S TOOLBOX

Provide a summary of the below toolbox topics during your toolbox talk.

Inclusion and Diversity Moment:

We want Suncor to be a great place to work for everyone. That means we are committed to a culture of inclusion where every employee feels valued and respected so they can contribute their best.

In an inclusive work environment, we face bias directly and opportunities are based on business needs, job requirements, skills, ability and potential.

Diversity is about individual differences and uniqueness.

Inclusion is about respecting and valuing those differences in ways that enable people to make their best contribution. Inclusion is about you.

Inclusion unleashes the power of diversity, fostering an organizational culture where everyone feels comfortable speaking up and being themselves.

We believe diversity of thought, experience, skills and background across our workforce leads to better outcomes and is proven to improve innovation and performance.

We also believe:

a culture of inclusion allows us to attract and retain a broader range of talent intentionally bringing people together who think differently adds value to the conversation and helps make better, more innovative decisions in creating an environment where all employees are treated respectfully and feel valued.

Safety Recognition

“Just want to take a minute to recognize four workers. Two from APTIM and two from MML. Terry Blinkhorn, Ray Boutilier, Valarie Antoine and Edna Caines are four labourers that have been great team players in PLT8 outage. Two companies working side by side as one to help each other. By making sure our workers go home safe at the end of every shift. Washing down the work areas to prevent any flash ups. Keeping the ground clean, and free of tripping hazards. Taking the time to make sure air movers are working, and gas test are up to date before letting anyone enter a confine space. Taking the time to make sure workers are wearing the proper PPE. The spark containment is outstanding and the crew takes the time to clean up after each task. Great communication between the two groups.

We have received lots of positive feedback from safety & management that these workers are doing an awesome job keeping our workers safe. This is why they are receiving the Collaboration and Expect Accountability Coins.”

- **David Earle (Execution Coordinator)**
