

Northern Crane Services Inc.

Company Overview

Founded in 1987, Northern Crane Services ("NCS") is the largest independent full service crane-operating company in Alberta. Majority owned by Canadian investors, NCS has been a long-time participant in the growing Alberta economy. NCS prides itself on being one of the most versatile and quick to mobilize crane service providers in the business. With many years of full-time operating experience, NCS has encountered every conceivable challenge associated with the business while learning new and better ways to address some very unique circumstances.

Plant maintenance and shutdowns are one of the specialties of NCS; it has successfully performed these services for all of the plants in the Alberta Oilsands region. NCS is an active participant for similar work in other plants for most of the other large energy companies in the province.

NCS has a knowledgeable and dedicated workforce of employees committed to serving its customers. In addition to its employees, NCS has a diverse fleet of approximately 100 cranes, ranging in size from 8 tons to 1,000 tons. The Company's fleet consists of carrydecks, picker trucks, folding tower cranes, rough terrain cranes and all terrain cranes. NCS's modern fleet is predominantly Liebherr cranes and is capable of completing even the most complex lift services.

As a preferred service provider in the crane sector, NCS is a company that provides lift services ranging from standard to heavy and complex lifts for construction and maintenance projects. Our services include the following:

- Fully operated and maintained crane service
- Bare rental cranes
- Contract lifting
- Highway hauling/heavy hauling
- On-site transport
- Engineered lift studies are provided by a sister company NC Engineering Services Ltd.
- Logistics: Route studies, from manufacturers location to site location

- Jacking and skidding systems
- On-site management and safety

Northern Crane Services looks forward to providing its lifting capabilities to you. For further information, a quote, or to discuss how best to deal with your lift and transport needs, please contact any of our offices.

Our customers demand unique lifting solutions and Northern Crane Services has a history of providing the necessary equipment required to meet their needs. NCS was the first crane company in Canada to bring a Liebherr all terrain crane into the country and has continued to stay at the forefront of our customers' needs. Our modern fleet of cranes consists of:

- Carry-decks to 15 ton capacity
- Boom Trucks to 30 ton capacity
- Truck-Mount Hydraulic Cranes to 100 ton capacity
- Rough Terrain Cranes to 80 tons
- All Terrain Cranes (up to 1,200 ton capacity)
- Conventional Cranes to 600 ton capacity
- Hydraulic Conventional Crawlers to 300 ton capacity
- Link Lift and Lock capacity to 600 Ton capacity
- Mobile Folding Cranes
