

Melloy Industrial Services Inc.

Melloy Industrial Services Inc. is a nation-wide industrial contractor, servicing the oil sands, refining, petrochemical, pulp and paper, power and oil and gas industries.

In addition to constructing new facilities, we perform maintenance and heavy turnaround work in operating plants and hazardous areas.

Other key services include new fabrication and repair of pressure vessels, piping, fired heaters and exchangers in our fabrication facility; and emergency call-outs, using skilled trades and specialized equipment for field repair work.

We are renowned for our ability to perform specialized automated orbital welding, as well as most types of exotic alloy fabrication and welding. Our quality management program is based on the universal standards of ISO 9000. We hold current ASME, CSA and National Board R, S, and U stamps.

Our 21,000 square foot office and shop is located in Nisku, Alberta (just south of Edmonton). In addition to being a state-of-the-art fabrication facility, it supports our field operations and services as a base for new construction and welder testing. Surrounding the shop is a five-acre assembly yard that is specially designed to accommodate heavy loads.

In March 2004, Melloy Industrial Services Inc. became a member of the PCL family of companies. PCL is one of the largest general contracting organizations in North America.

We work hard, especially at safety.

Our unwavering commitment to working safely is demonstrated through an overriding concern for the safety, health and wellness of our people and through our collective efforts to reach our goal of zero incidents.

Our safety program works because we don't treat safety as a separate process; it is fully integrated into the construction planning cycle. We address safety as part of every task we perform throughout our organization.

We all share the responsibility for delivering high safety performance, while at the same time achieving optimum quality and productivity.

Work With Us

Melloy Industrial Services Inc. is well known in the industry for its ability to perform difficult plant, equipment and piping repairs, change outs and installations, servicing the oil sands, refining, petrochemical, pulp and paper, power and oil and gas industries for over 18 years. We have the ability to provide design, planning, site engineering, as well as equipment supply, maintenance, inspection, repair and upgrade services; with turnarounds, or shutdowns, being the mainstay of the company's business.

We offer our employees opportunities for long-term careers in diverse disciplines, flexible employment practices, bonus and profit sharing programs as well as competitive wages and benefits programs. One of our greatest features is that we are 100 percent owned by employees and offer ownership opportunities at all levels.
