

## **Transfield Asset Management Services Integrated Limited**

### **Exceptional People, Assets and Solutions**

**TAMSIL** (Transfield Asset Management Services Integrated Limited) partners with the mining, oil, gas and power generation industries to provide Asset management services; Turnaround and shutdown management and execution services; Site wide maintenance support services; and Sustaining capital engineering and construction services at Suncor's Oil Sands Operations located at Firebag and Oil Sands in Fort McMurray.

We strive for continuous improvement and the highest safety standards while working with our clients in a collaborative framework.

TAMSIL is the operating arm of FT Services; a joint venture between Transfield Services Ltd. - Australia and Flint Energy Services Ltd. - Canada. The joint venture was formed in August 2006 to deliver operations and maintenance solutions to the oil and gas and power generation sectors in Canada. FT Services brings together Transfield Services' leading experience in asset management and maintenance of complex systems and technologies together with Flint's extensive Canadian hydrocarbons expertise and business relationships.

To effectively provide integrated solutions that deliver operational excellence to our clients' businesses, TAMSIL is supported by and works closely with ThyssenKrupp Safway, Inc. for scaffolding services and WorleyParsons for engineering services.

TAMSIL is proud to be a signatory to the General Presidents' Maintenance Committee Agreement and employs trades people through the Building Trades Unions.
